Sample department :

: We have separate two strong sample and pattern making section one for Knit and one for Woven unit at factory.

Marketing department :

: 2 Marketing officer working under a Marketing Director for Knit and Woven both .

Merchandising department :

: 5 Sr. Merchandiser under a Merchandising manager at corporate office.
: 2 Sr. Merchandiser and 3 assistant Merchandiser at factory.

Commercial department :

: 5 commercial officer working under a Commercial Manager at corporate office.

Compliance department :

: 4 compliance officer working under a Compliance Manager at factory.

Administration department :

: We have very organized and strong administration department at our factory.

Our Quality control system :

: To Maintain the production quality as per required of European and USA buyers, we have setup a separate and independent quality assurance department. The quality is supervised by a highly experienced quality manager and a team of Well-trained quality inspectors. The Quality Assurance Manager leads his QA department independently and he report only to the top management.

The basic approach to good quality is to use high quality materials, right methods and properly adjusted machines during production. With this setup we have been able to maintain an AQL as per buyer's requirement (1.5 / 2.5). Records are Maintained at all levels of the production and quality control, including complete broken needle records.

Compliance issues :

- : **We maintained a very high standard compliance, Few points are as follows :**
- No child worker or forced worker.
 - Working hours 54 to 60 hours per week (including over time).
 - Workers enjoy one holiday in every week.
 - We ensure safe and hygienic working environment for workers.
 - We have an in-house clinic with residence doctor and nurse.
 - First aid facility is available in each floor.
 - We have a day care centre for children of workers.
 - Our fire team exercises fire drill frequently and minimum one drill every month.
 - Factory has double emergency exit system as per required under Bangladesh factory act
 - All machines are covered with belt guard.
 - All machines have needle guard.

It is not only equipped with most modern production facilities but also has continuous access to the latest development arena of production process and technical know-how from world renowned sources. From 1992 we have excellent experience with good reputation in Knit & Woven. We have a very strong Energetic, well calculative and hard working merchandising and also Quality control team. We are confident and also I am assuring you that we will meet our commitment for delivery and quality also.

So considering above if you feel to expend/develop a business relationship with a new manufacturer then definitely you have to consider us and our company should be your right choice of Knit & Woven sourcing from Bangladesh, we confident.
